WILL PLACE THE BLAME

Some One Will Be Punished for Bad Camp Conditions

SURGEONS ACCUSE COMMANDERS AND VICE VERSA.

Washington, Sept. 2—Special—The dispute as to who is responsible for the ills from which the soldiers in camp and field have suffered has resolved itself into a controversy between the medical staff and the commanding officers. The latter insist that the surgeons were negligent and indolent—that they would not use the means at their command for the relief of the ailing unless it was brought to them on a silver salver ornamented with gold fringe, and that they would not put themselves to the slightest inconvenience to save a life. This the surgeons deny, and retort that the commanding officers made no effort to procure medicines, which were frequently not to be obtained; that they ordered men upon duty who ought to be in the hospitals; that they camped their men in insalubrious localities when better grounds were available, and were in all respects overbearing and sometimes cruel. Much of the truth may rest in the charges of both sides, and those in authority are hopeful that out of the controversy facts will be evolved which will lead to fixing the responsibility where it justly belongs.

ATTENTION PAID TO GROWING CROPS

TOBACCO DEALERS REPORT BUT LITTLE BUSINESS.

Many of the Dealers Are Now Sampling—Some Local Sales Have Been Made of Late—Tobacco Crop This Year Promises To Be a Good One.

The attention of the tobacco growers is now solely devoted to securing the ripe crop which is going into the sheds under very favorable conditions, says the Wisconsin Tobacco Reporter. The work is being rapidly carried forward and the close of the present week will see over half the crop safely housed. The warm weather of the week has been conducive of rapid curing of the early fields.

Sampling of the '97 is being commenced earlier than usual due in a measure to the fact that packers are besieged with inquiries from manufacturers anxious to give these goods a trial. Something like 1,000 cases of '97 have been disposed of by local packers during the week and the trade is taking very kindly to the samples offered for inspection.

The shipments out of storage reach 10 carloads, about 500 cases, to all points from this station for the week. Since last report 1300 cases of cigar leaf were exported from New York.

In speaking of the tobacco market here The Leaf says: Local market conditions are brightening up a trifle. But with the thermometer climbing skyward as it has been for the past week it is almost impossible to try to do much business.

F. S. Baines is sizing bundle goods and sold this week 432 cases '97 also 77 cases '92, '93 and '94. Soverhill & Porter sold a 30 case lot of '93 and a 24 case lot of '97. Joseph Grundy sold 35 cases '92, '93 and '94. C. E. Tallard bought 110 cases '92 and '93 of C. Swinler, of Edgerton.

RECEPTION AWAITS THE SOLDIER BOYS

LOCAL BUSINESS MEN FAVOR THE PLAN.

In Many of the Cities Through the State Celebrations in Their Honor Have Been Held—Janesville Should Be No Exception—The Boys Surely Deserve It.

Judging from the sentiment shown throughout the city Janesville will show her patriotic side in the course of the next few weeks, and without doubt one of the greatest demonstrations this city has ever witnessed will be in evidence. The present plan is to give the returning Janesville soldier boys on their arrival here an ovation that will long be remembered. Several of the leading public spirited men of the city have suggested that The Gazette make mention of the fact, so as to see how the general public felt about the plan of holding a celebration and reception combined on a large scale. The idea seems to meet with favor on every hand.

EVERYBODY WELCOMES THEM

Throughout the Badger state nearly every town and city that has a company in its service are making plans for holding a grand jubilee on their return home. Various organizations have been called upon to lend their aid and support to the movement. Many business men suggest to combine the arrival of the soldier boys with the celebration. Many cities have held celebrations when a war was declared between the United States and Spain, and no exception. Now it is the time to make up for this, and it is not likely to be for three or four weeks as it takes time to get the various companies as they reach Wisconsin. Every music in the city will be secured, and the spacious locality should be made where welcoming speeches, etc., could be made.

PICKPOCKETS WERE ON HAND

Monroe County Fair Was Infested by the Light Fingered Gentry.

Those from here who attended the Green County fair yesterday at Monroe were obliged to hold onto their pocketbooks and keep a good lookout for their valuables. Thieves were plentiful. A Milwaukee detective who was engaged by the fair association is officer of the grounds and the first day he recognized six well known pickpockets who were sent out of town. Today he notified fifteen other crooks and sure-thing workers to leave. Marshal Blunt arrested five pickpockets down town during the day and others who were notified to leave took advantage of the chance that was given them. Heretofore they have not been molested, and this no doubt accounts for the unusual number that showed up this year.

We are showing up Heinz delicacies in our east show window. Sanborn.

Failing in this—and failure is probable—congress will take the case in hand and appoint a committee of inquiry with full power to get at the facts.

Efforts to Form a Fusion Have Practically Failed—But One Candidate Finds His Name on Both Tickets—Judge Sawyer Endorses the Democratic Platform

Milwaukee, Sept. 2.—The following is the complete ticket nominated by the democratic state convention: For Governor—Judge Hiram W. Sawyer, Hartford.

The Populists. Milwaukee, Sept. 2.—The populist state convention completed its work last evening by the nomination of the following ticket:

For Governor—A. A. Worsley, Racine.

For Lieutenant Governor—Spencer Palmer, Fond du Lac.

For Secretary of State—Winfried L. Arver, Milwaukee.

For State Treasurer—John Powers, Pierce.

For Attorney General—L. Woodard, Pardee.

For State Superintendent of Schools—A. H. Craig, Mukwonago.

For Railroad Commissioner—Robert E. Arger, Oshkosh.

For Insurance Commissioner—John F. Schindler, Milwaukee.

Judge Sawyer Speaks

In the democratic convention Judge Sawyer, who had been nominated the previous day for governor, addressed the convention. He had read the platform, he said, and he could not but be proud of it. It was patriotic and able and he could stand upon it. Discussing the planks of the platform, he said that corporations were the servants of the people and should not control the people. The reins of government should not be surrendered to them, but they might as well be surrendered to them as to the republican party. He concluded by predicting democratic victory and cautioning the democrats not to be overconfident, but to organize early and work hard. There was prolonged applause at his close.

Fusion Defeated

Much time was consumed over the question of fusion. The populists demanded the offices of secretary of state and superintendent of schools. The democrats refused to give up the former.

TALKED OF HIS CRUISES

Rev. Dr. Curtis Speaks to Old Friends Of His War Experiences

The experiences of a chaplain on board a United States vessel of war formed the theme of a lecture given at Court Street church last evening by Rev. Dr. Olin A. Curtis, former pastor of the church. The evening was a stately one and the attendance was consequently small but those present were amply repaid for coming out.

It was merely by accident that Dr. Curtis secured his appointment. He heard that the chaplain of the St. Paul was ill and offered his services as a substitute without pay. They were accepted and he at once provided himself with all the wholesome reading matter he could procure and was ready for the voyage. The cruising of the St. Paul in the Caribbean Sea and elsewhere was graphically described. The St. Paul was first used as a scout ship and as such discovered Cervera and alone blockaded Santiago harbor for several days. Later it was raised as a troop ship, and so Dr. Curtis' parish was made up of three classes of men, the troops who were being transported, the sailors and the marines, generally two thousand in all.

Dr. Curtis then described several typical scenes on board at night, when the deck, six hundred feet long, was literally jammed with men lying on their blankets, trying to go to sleep; the running down of suspicious craft, a time of intensity; the landing of troops with its comical and its pathetic side, and the greatest study of all, the mess table. The captain messes alone and the other officers mess together. The mess table, with the conversation of those who enjoyed it, was a revelation to Dr. Curtis.

The St. Paul was in all 'be hot places on the southern coast of Cuba. By special invitation Dr. Curtis accompanied Capt. S. G. when he visited four of the wrecks of Cervera's fleet while they were still smoking and before the bodies had been removed. There he saw things too horrible to tell. He saw the bombardment of Santiago and was near enough to Morro Castle to see the Spanish flag come down in final surrender.

The talk was not intended as a lecture, but merely a plain recital of what the speaker saw on his voyages, and proved very entertaining to those present.

GATHERED INTO GOD'S REST

THIS DAY IN HISTORY.

1666—The great fire in London began near the Tower; it continued five days, destroying 10,000 houses, besides churches, etc., or five-sixths of the city.
1720—John Howard, philanthropist and prison reformer, was born at Hackney; died in Russia 1790.
1768—Lady Mary Hervey, famous for beauty, wit and goodness in the court of George III, died.
1813—Battle of Dresden and mortal wounding of General Jean Victor Moreau.
1870—Surrender of the emperor's army at Sedan; Napoleon delivered his sword to King William and surrendered 4,000 officers, 14,000 wounded and 82,000 fighting men.
1894—The towns of Hinckley, Pokagon and Mission Creek, Mich., destroyed by forest fires; over 450 lives lost and many people injured.
1896—Lorenzo Niles Fowler, the noted phonologist, died in West Orange, N. J.; born 1811.

HON. WILLIAM G. WHEELER

The republicans of the first assembly district acted wisely in renominating Hon. William G. Wheeler to succeed himself as a member of the legislature, and that the action of the convention will be ratified by the people at the polls, goes without saying.

Mr. Wheeler was born and raised in Rock county. He has developed from the son of the farm to his present position before the eyes of the people. They know him, and know him well. They know him as a faithful public servant; they know him as a successful lawyer; they know him as a tireless worker for republicanism; and last, but most important of all, they know him as an honest man—the noblest work of God.

Naught but good can be said of William G. Wheeler. His integrity, his ability, and his manliness have made an impress, and have won him friends without number, not only in his home district, but wherever he is known.

Although he was serving his first term in the legislature two years ago, the inevitable recognition that ability commands made him a leader in that body, and he was highly honored by his associates. He was selected to make the speech placing Hon. John C. Spooner in nomination for United States senator, and his able address drew favorable comment from all who heard it. He was placed upon important committees, and his advice was sought and carried weight. There was no more influential members than "the gentleman from Janesville," and when he raised his voice on the floor of the house, he always held an interested and respectful audience. Strangers recognized his worth as quickly as had the people of Rock county, and with the valuable experience gained at the last session, will come added usefulness in the next.

Rock county may well be proud of men of Mr. Wheeler's stamp, and Mr. Wheeler may well be proud of the hearty appreciation of his abilities as evinced by his constituents at the convention.

DIAMOND WEARERS PAY IT

People who wear imported precious stones these days are compelled to help pay the expenses of the government for the privilege. This is as it should be. People who can afford such things can afford to contribute to the public treasury. Under the Dingley tariff law the income from this source has been doubled. The United States appraiser at the port of New York reports that during the year just closed the government has received from duty on cut stones the sum of \$806,612.52, as against \$402,907.16 during the year ended August 1, 1897. The actual importations of precious stones for the two years were as follows: Year ended August 1, 1898: Cut, \$8,005,125.19; uncut, \$4,077,370.32. Year ended August 1, 1897: Cut, \$1,064,997.10; uncut, \$1,367,179.10. The total importations of cut and uncut stones for the year just closed amounted to \$12,143,995.51, and for the year ended August 1, 1897, \$2,432,176.20.

This is but one of the many advantages afforded by the Dingley law.

The larger the majority the better this fall. Wisconsin, Rock county

and Janesville should send for President McKinley.

him smile. This should be a publican year, and all good citizens should not only vote the ticket straight but do "missionary work" as well.

WHAT MORE COULD BE ASKED?

The Dingley law is making a great record for itself, the figures up to August 1 showing that, omitting the outlay for war expenses, the law would have accumulated a surplus of \$9,000,000 during the past five months. The new law has turned out the tide of gold in our direction, has made possible the greatest commercial report for a fiscal year in our history, has promoted home industries, and would have accumulated a surplus had it not been for the war. What more could be asked, and yet the clammy howling papers of the country are just at this time full of editorials declaring that the law is a failure! Let the Dingley law run another five years, says the Des Moines Register, and the statesman will be wondering what to do with the surplus.

Glance over the republican ticket, which is printed on this page. You know all the men whose names appear thereon. They are all sterling citizens and good business men.

Beloit Cigar Maker Loses a Leg—Crushed Beneath Stone

Fred Janich, the cigar maker who was brought here from Beloit with a badly crushed right leg, suffered amputation at the Palmer Memorial hospital yesterday. The operation was successfully performed by Dr. E. E. Woods, assisted by Dr. Samuel Bell, of Beloit; Dr. Frank B. Farnsworth and William M. Bonesteel, a student in Dr. Woods' office.

Frank E. Pellant, who resides at the corner of High and Rock streets, had his feet badly crushed while at work yesterday afternoon at the Milwaukee stone quarry. He fell under the wagon that was heavily loaded with stone.

Overalls That Sell On Sight.

For a month we have been selling Janesville railroad men and machinists the Lightning overalls and jumpers. They are so much more convenient than other overalls that they sell on sight. The lightning jumpers and overalls were adopted by the Wabash Railway company and their employees as being superior to all other makes, and engineers, firemen, baggage men, expressmen, messengers and crossing watchmen for the entire system are supplied with these garments. We are sole agents in Janesville. T. J. Zeigler.

WAS A SQUAW MAN.

Definition Applied to Himself by an Inactive Army Officer.

"At a recent reception at which the fashion and beauty of Denver were assembled one of the ladies found herself seated next to Gen. Sumner," says the Denver Times. "He had been presented to her earlier in the evening, but she had not quite caught his name—certainly not his title. Beamingly, she asked: 'May I ask what is your occupation? Don't think me rude, for I have made a study of determining such matters without asking questions, but I must confess that you puzzle me. I am at a complete loss to place you.' 'Madam,' replied the commander of the department of the Colorado, with his most serious countenance, 'I am a squaw man.' 'A—what?' she managed to gasp. 'A squaw man, madam.' 'I am afraid I don't quite understand yet,' said the fair interlocutor after a few minutes' cogitation, in which she took in the general's whole appearance, and decided that there must be another meaning to the term beside that to which she had been accustomed. 'Why, that is easy enough to explain. In army parlance a squaw man is an officer who, when the rest of the officers are at the front fighting and winning glory, is left at home to guard the women. Madam, I am such an officer.' 'Oh, that's different,' she ejaculated. And then the whirl of the throng carried them apart."

The Water Viper.

In the reptile house of the Zoological gardens, London, there is one snake, not more than two feet in length, which is more dreaded by the natives of the country in which it is found than even the deadly rattlesnake itself. The animal is called the water viper. The bite of this small snake is not more fatal than the bite of the rattlesnake, but the increased danger lies in the fact that the water viper is much more ready to attack any one. The rattlesnake is so timid that it always tries to escape, and only bites when it cannot do so. On the other hand, the water viper boldly faces the danger, and at once makes ready to attack either person or animal. Further, the rattlesnake announces its presence by means of the rattle in its curious tail, which gives it its name. But the water viper silently and stealthily inflicts a deadly wound before its presence is known. Though fond of the water, in which it spends much time, it likes to bask in the sun. To enjoy the warmth it often climbs a tree on the bank of a river, and coils itself on a branch which overhangs the stream. When hungry, it simply lets go its hold, drops into the water and swims away. By means of its tail, which it waves from side to side, it swims very fast, and it is also an expert diver. In speed it can out-swim the fishes on which it feeds.

Smartest One Along Shore.

In a Massachusetts seaport town there is a retired sea captain who makes frequent trips to that he has the "smartest woman along shore." New instances of her enterprise are constantly coming to notice. The last one was to an exploit by which she secured herself a doctor's bill. The captain tells the story with great relish. "She's getting pretty heavy," he begins, "and now and again she'll miss her footing. Well, not many months ago she missed it on our stairs, and fell all in a heap down three steps on to her side. When I got to her, she said, just as brisk as usual, 'Don't ask me if I've hurt myself, cap'n, for of course I have. I reckon I've unjointed a bone in my left leg, falling on it. Now, don't try to pull me up. Let me scramble round a minute and you go for the doctor.' Well, the doctor's our next neighbor, so it didn't take long to get him. He looked her over, and said there was a bone somewhere round her left hip that was out of kilter. At that mother rose right up on her feet and toppled over the opposite way from what she'd fallen down stairs, and we heard a kind of crack. She looked up at the doctor with her mouth kind of whitish, but the same old twinkle in her eyes, and she says: 'I believe I've set that bone, myself, doctor,' and she had!"—Youth's Companion.

The Handkerchief Dilemma.

There is a new belt, a muffler belt, or what its name implies, a silk handkerchief made into a girdle. There are two designs. One is made by folding the big brilliant silken square until it forms a narrow band, measuring from corner to corner about forty-six inches when stretched out. This is brought around the waist, hiding the skirt band and place where the bodice and skirt meet, and taken around to the side and knotted in two flowing ends, fastened by a brilliant buckle or clasp of silver or gold. The clasps are riveted or sewn on, so that they measure the same as the waist band, and when in position the whole forms a graceful and really pleasing effect, strange as it may seem when told in print.

The other handkerchief designs are called girdles, and are made in a very different manner. They are shirred to a high point in the front like a corset front and shirred at both sides with bones sewn in to make them hold their place. At the back they are gathered into a slim shir, and the corner points are allowed to fall in two gradual tails that show the border and make a neat finish to the otherwise crude hemming that ordinary bolt silk would show. They are more graceful than ribbon, however soft and wide it may be.

Picture Trains in France.

The Western of France railway runs an express train in the morning from Paris to St. Malo and Paramere, the cars of which have pictures upon them. One has an elephant, another a lyre, another a snake, and so forth. There are anchors, huntsman's horns, balloons, tricolored flags, bunches of grapes, swallows, a pair of scales, a star, an angel with his fishing rod. It is thought that one of these designs will be more readily remembered than a number, and, according to all accounts, passengers are very much pleased with the innovation. Before long the Western of France directors hope to have picture trains on all their lines.

Railroad Men Need Good Overalls...

For a month or more we have been showing the Lightning Jumper and Overall. Every railroad man and machinist who sees the garments wants them. Their value is recognized at once. The Overalls open at the front instead of at the side and the shoulder straps need never be unbuckled. They lift off and on the shoulders like the suspenders on a pair of trousers. The old style opening and closing at the side leave a gap of several inches for grease and dust to pour through onto the under garments; also the apron of the old

style being solid the suspenders have to be attached and detached every time they are worn. The Lightning Overall and Jumper being so snugly closed up it is not necessary for the wearer to keep his top clothing on and thereby making them feel bungle-some. A supporter pulls through the strings on the waist bands of the drawers, and consequently keeps them from slipping down over the hips.

All Garments Union Made And Bear the Label.

These Jumpers and Overalls were placed before the delegates of the Brotherhood Locomotive Engineers at their convention held in St. Louis, May 11th, 1898, and pronounced as being the most practical they had ever seen and seventy five per cent. of them purchased from one to six suits each for personal use. The Lightning Jumper and Overalls were adopted by the Wabash R'y Co. and their employees as being superior to all other makes. They beat the world as working garments for railroad men and machinists. We are sole Janesville agents.

ORGANIZE FOR CAMPAIGN WORK

REPUBLICAN STATE CENTRAL COMMITTEE IN SESSION.

All the Candidates Were Present—An Executive Committee Was Chosen and a Ringing Address to the Voters of Wisconsin Was Adopted—Duty of the Hour.

Milwaukee, Wis., September 2.—A meeting of the Republican State Central committee was held yesterday afternoon at the Hotel Pfister. Every member of the committee was present, and reports were submitted from all the congressional districts in the state showing the most favorable conditions. In addition to the committee men there were present Jesse Stone, of Watertown, candidate for lieutenant governor; W. H. Froelich, of Jackson, candidate for secretary of state; E. B. Hicks, of Oshkosh, candidate for attorney general; Emil Gijohann, of Milwaukee, candidate for insurance commissioner; Graham L. Rice, of West Superior, candidate for railroad commissioner, and L. D. Harvey, of Milwaukee, candidate for state superintendent of public instruction.

Officers Chosen.

G. P. Stickney, of Milwaukee, was chosen as secretary of the committee. W. A. Richter, of Milwaukee, assistant secretary, and Leander Ferguson, of Brandon, treasurer.

The following executive committee was selected: J. B. Treat, chairman, ex-officio; C. C. Jennings, of Racine, George E. Bryant, of Madison, James A. Stone, of Reedsburg, C. M. Gregg, of Milwaukee, C. W. Fraser, of Waukegan, Ira P. Conn, of Plainfield, N. O. Foster, of Fairchild, Charles Reynolds, of Jacksonport, and Norman B. Black, of Marinette. The tenth congressional district, at the request of the committee men from that district, is not represented on the executive committee, it being urged that the district was so far off that it would be better to make the committee up without them.

A Ringing Address.

The following address was formulated by the committee and will be sent out to the voters of Wisconsin:

The issue for the present campaign in the state of Wisconsin is now clearly set forth. The democratic state convention today endorsed the Chicago platform, placing the democratic party squarely upon the silver platform upon which their ticket went down to defeat in Wisconsin two years ago.

It is the same free silver repudiation principle for which the silver democrats stood in 1896, and no amount of talk or sophistry can obscure it. The democrats in their platform today have much to say about state issues. Upon state issues the republicans of Wisconsin can meet them eagerly and gladly with a record which will put them to shame; but the republicans must not forget for one moment that the purpose of the democrats in talking of state issues at this time is to obscure the real issue, which is the financial one.

Do not let this be forgotten for a moment, that the free silver men are in control of the democratic party in this state. We have ten congressmen to elect in Wisconsin this fall, and it would be a calamity for Wisconsin to send a single silver democrat to Washington. Here is the silver plank in the Chicago platform which the democrats of Wisconsin endorse:

"We demand the free and unlimited coinage of both silver and gold at the present legal ratio of 16 to 1."

In contradiction to this read the following money plank adopted by the republicans at their state convention in Milwaukee on Aug. 17:

"We believe that the declaration in the St. Louis National Republican platform for the maintenance of the gold standard and the parity of our forms of money should be enacted into law, and the money of the American people should be made and kept like all its institutions, the best in the world."

The friends of sound money desire no clearer issue than this. Remember, that not only have we to elect ten congressmen, but a senator will be elected by the coming legislature. Altogether the most important issue that this country or state has had to deal with, is the question of honest money, and a state that has so nobly for years stood for sound money cannot afford for one moment to permit the real issue to be obscured or the friends of cheap money and repudiation to gain any advantage.

We shall have with us in this contest, as we had two years ago, all the sound money democrats, of whom 35,000 voted the republican ticket in 1896. Make it clear to the republicans and sound money democrats in your section that the issue is as clearly drawn and as well defined on this money question now as it was two years ago. If the issue is properly kept before the people, the republican ticket this fall, congressional, state and legislative, will have an overwhelming majority. Respectfully,

J. B. TREAT, Chm.

SPECIAL NO. 1.

Ford's New Departure.

We are ready this month with a change of size plan. We have added to our line a limited, but very carefully selected line of ready to wear...

Suits, Overcoats and Trousers...

The change is in the line of better facilities for meeting the popular demand for reliable tailoring at rock bottom prices. Fair investigation has shown us that this is not done by the work turned out by mail-order tailoring firms in Chicago. Neither in fit nor workmanship do they come up to the mark. In the stock we now offer we overcome these defects. We show a line such as ready-made clothing houses do not carry—specially designed for us from suggestions gained in thirty years in the custom tailoring business. In reality the garments are first-class custom tailoring laid before you ready to wear. The stock abounds in good points. Detailed mention will be made from day to day of the inducements offered to careful dressers.

LATE NEWS BY TELEGRAPH

TROOPS ORDERED TO PANAMA.

Battery B. Is Dispatched from Galesburg.

SITUATION VERY SERIOUS.

Mob of Miners in Control at Panama—Operators Captured and Held—Labor Leaders Have Hard Work to Restrain Their Followers.

Galesburg, Ill., Sept. 2.—Battery B, 1st N. G., received orders last night to leave for Panama. About sixty men, with five Gatling guns, under command of Lieut. Frank Henry, started on a special Chicago, Burlington & Quincy train by way of Beardstown.

Springfield, Ill., Sept. 2.—Notwithstanding repeated appeals from the sheriff of Christian county and from the mayor and prominent citizens of Panama, Gov. Tanner has not yet been convinced that a necessity has arisen for the use of the militia, although recent developments indicate that this point may be reached in a few hours.

The mining troubles at Panama have reached a serious crisis, and both the officers of the law and the leaders of the miners' organization realize it. State President Hunter, State Secretary Ryan and other officials called on the governor to ascertain his policy in case of an outbreak, and also whether he could in any way prevent the importation of miners from other states. The governor announced that he had no sympathy with the policy of labor as pursued by the Panama operators, but said there was no law to prevent the men from coming here and working. He said that so far as his action in a supposed case was concerned he would not "cross that bridge until he got to it."

The only organized militia left in the state are the battery at Galesburg and naval militia at Moline and Alton. These will be used first in case of necessity, and if more soldiers are needed a provisional regiment raised for the war with Spain can be converted into a national-guard regiment. To do this it would only be necessary to revoke the leave of absence of one of the national-guard regiments in the United States service, muster it out of the national guard and muster a provisional regiment in its place. By doing this the governor would keep within the law and not exceed the number of national-guard organizations fixed by law.

David Ross, secretary of the state bureau of labor statistics, left for Panama last night to look into the situation personally and acquaint the governor with the facts as they exist there.

Pana, Ill., Sept. 2.—Only the earnest pleading of John Mitchell, William Topham and other officials of the Coal Miners' union prevented an armed demonstration against the Springfield coal shaft. David J. Overholt and Lewis J. Overholt were captured about 1:20 p. m. by twenty miners and marched toward the shaft.

Dr. A. Millard, an old baptist preacher, received severe injuries while trying to rescue the Overholts. He was knocked down with a revolver, his nose and jawbone being broken. Internal injuries were sustained and he may not recover.

The officials of the miners managed to induce the more frantic men to listen to reason. Some one cried, "Let us have a parade," and, with a cheer, the men moved toward the business part of the town, with the Overholts in the front line. At Schnyer's bank the crowd halted and the prisoners were taken into the president's private office, where they conferred for a time with the principal officials of the miners. In a half hour they were released and hurried to the shaft.

METHODISTS AT TORONTO.

Quadrennial Conference of the Church in Canada and Japan.

Toronto, Ont., Sept. 2.—The fifth general quadrennial conference of the Methodist Church of Canada, Japan and Newfoundland met here Thursday. The Rev. Dr. Carman, bishop of the Methodist Episcopal Church before it united with the present body, and now general superintendent of the Methodist Church in Canada, in his address presented statistics showing the growth of the church. In the last four years the total membership increased from 19,584 to 280,537.

Referring to the plebiscite on the prohibition of the manufacture and sale of alcoholic liquor soon to be taken throughout Canada, Dr. Carman made a strong appeal in favor of a favorable vote. An interesting question which the conference is expected to deal with is a proposition for legislation to enforce the general use of individual communion cups.

Cable to the Philippines. New York, Sept. 2.—At a meeting of the directors of the Pacific Cable company plans were considered for establishing cable communication with the Philippines, and Asiatic coast, Japan and Australia, via Hawaii. Surveys for a duplicate cable by way of Sitka and the Aleutian Islands were ordered.

Damaging Blaze in St. Louis. St. Louis, Mo., Sept. 2.—At midnight the five-story brick building of the A. Geisel Tin Manufacturing company took fire and within twenty minutes was totally destroyed. The loss is estimated at \$200,000.

FRAUDULENT BIDS FOR BONDS.

Many of Them Discovered—Bonds Probably Will Not Be Issued.

Washington, Sept. 2.—A wide investigation of suspicious bids under the last call for subscriptions to government bonds has been completed by Solicitor O'Connell of the treasury department and Thursday he submitted to Secretary Gage the mass of testimony on the transactions.

Several thousand subscribers were examined. The facts developed show a systematic scheme operated by single parties to secure a large amount of the bonds. The reports indicate that millions of dollars in bonds were acquired by irregular means and that a number of New York bidders are involved in the cases.

Secretary Gage said the investigation showed that a large amount of the bids offered were not bona fide, but that in none of the cases involved in the investigation had the bonds been issued to the bidders. He said he had no doubt, however, that in some instances, as yet undiscovered, bonds bid for in a similar way unknowingly to the department had been issued.

REGIMENTS MUSTERED OUT.

War Department Orders Transport of Troops.

Washington, Sept. 2.—The war department has issued orders for the following transports of troops for the purpose of being mustered out at their destination:

First Illinois Infantry, from Montauk to armory in Chicago; First Wisconsin, from Jacksonville to Camp Douglas, Wis.; Fifth Ohio, from Ferdinand to Columbus; First United States volunteer cavalry (rough riders), Thirty-third and Thirty-fourth Michigan, from Montauk Point to Camp Eaton, Island Lake, Mich.; First Connecticut, from Dunn Loring to Niantic, Conn.; Fifth Iowa, from Jacksonville to Des Moines; Third Virginia, from Camp Alger to Richmond; First Mississippi, from Chickamauga to Lauderdale Springs, Miss.; Second Mississippi, from Jacksonville to Lauderdale Springs.

Great Britain Buying Coal.

Newport News, Va., Sept. 2.—The total shipment of cargo coal from this port for the month of August was about 116,000 tons. In addition to this, 10,000 tons were shipped by vessels as bunker coal, making the total amount 126,000 tons. The greatest bulk of this was shipped in coastwise trade for New York and Boston. The British government was a heavy purchaser, and it is estimated that fully 250,000 tons were consigned to it during the latter part of the month. This is destined to the different British naval coaling stations, among which are Montevideo, Gibraltar and Alexandria.

Cubans Go Over to Lawton.

Santiago de Cuba, Sept. 2.—Gen. Lawton, commanding the department of Santiago, has received word that the Cuban leaders Cebreco, Laceret and Pedro Perez have been ordered by Gen. Maximo Gomez to place themselves under Lawton's command. Gen. Lawton believes this arrangement will expedite the disbanding of the Cuban forces and has decided to employ Cuban officers in important civil positions in the province of Santiago de Cuba. Gen. Castillo will get a place and will act as Gen. Lawton's adviser in making other appointments.

Supreme Lodge Adjourns.

Indianapolis, Ind., Sept. 2.—The supreme lodge of the Knights of Pythias closed its work Thursday night. The principal business of the morning session was a decision to cut down the supreme tribunal to three members. This is not final, but must go for approval to the grand domains, and come back to the supreme lodge for final action two years hence. Much of the day was spent in discussion of the per capita tax, and various motions fixed it all the way from 5 to 10 cents. After considerable balloting, the tax was fixed at 8 cents.

Driver Is Under Suspicion.

Omaha, Neb., Sept. 2.—The police have not developed a clue in the robbery of the \$8,000 express package from one of the Pacific Express company's wagons Wednesday. All the men working on the case are unanimous in their belief that the driver of the wagon, George Archibald, is guilty of the robbery. Archibald, despite the severe "sweating" given him by Capt. Haze, maintains his original story.

Russia After New Guns.

London, Sept. 2.—Following the disarmament rescript of the czar comes news from Sebastopol that the Russian war office is convinced that the field artillery is the weakest arm of the service, especially as regards quick-firing guns. The military council has recommended the complete rearmament of the forces with the latest type of quick-firing guns.

CHICAGO LIMITED WRECKED.

Three Deaths Due to Dastardly Work of Tramps.

SWITCHES THROWN OPEN.

Train No. 5, Running Nearly Sixty Miles an Hour, Forced from the Track—Three Men Instantly Killed and Nine Very Seriously Injured.

Fulton, N. Y., Sept. 2.—Train No. 5, on the New York, Ontario and Western railroad, known as "The Chicago Limited," was wrecked at Ingalls Crossing, four miles south of this village, at 5 o'clock Thursday. The wreck was doubtless due to the dastardly work of tramps, who threw open the switch at which the train was wrecked, as well as two switches to the north of the wreck. The train was an hour and a quarter late and running nearly sixty miles an hour when it struck the switch and was thrown over to the side track. The rapid speed made it impossible to make a sharp turn, and the train left the track when it struck the safety rail. The engine was thrown twenty feet and blown to pieces. The tender was turned over. The trucks of the baggage car were torn off and the head coach telescoped the baggage car. A vestibule chair car and the sleeper Farragut were derailed, but neither was badly damaged. Engineer Dowd and Fireman Hall both jumped and were found under the wreckage of the tender by passengers from the sleeper. Dowd died in a few minutes and Hall three hours later. The body of Brakeman Osborn was torn in two. The dead are:

ENGINEER B. C. DOWD, Oswego. FIREMAN WM. HALL, Norwich. BRAKEMAN A. L. OSBORN, Walton. The injured: Baggage man Charles Desmond, New York, three ribs broken. David Mills, Oswego, face and legs bruised and scalp wound. John Golden, Oswego, burned about both wrists. C. A. Patten, Oneonta, hip sprained. John Ross, New York; shoulder bruised. Peter J. Hawkinson, Wellesley, Mass., scalp wound. C. A. Johnson, Wellesley, Mass., scalp wound. Gustave Magnuson, Boston, injured about head. Carl Svenson, Boston, injured internally.

The tent or light frame dwelling is the most comfortable sleeping and living place imaginable, and every person who can should take advantage of the comparative short season for camping or picnicking.
